SUMMARY

Backend Developer with hands-on experience developing enterprise ERP systems and RESTful APIs using NestJS, Node.js, Prisma ORM, and PostgreSQL. Experienced in building business modules, integrating third-party services, developing Excel/PDF data processing features, and optimizing database queries with additional experience developing mobile applications and NLP-based systems. Passionate about building clean, maintainable, and reliable backend applications.

SKILLS

Languages: TypeScript, JavaScript, Go, Python, Java, C++, Dart, SQL
Backend: Node.js, NestJS, REST API Development, API Integration, Authentication
Database: PostgreSQL, MySQL, Prisma ORM, Database Design, SQL Optimization
Other: Flutter, Flask, Docker, Git, GitHub, Postman, Swagger, Katalon, DBeaver, Testing, Technical Documentation

EXPERIENCE

PT. Data Integrasi Inovasi **Tangerang, Banten**
Fullstack Developer Intern October 2026 – Present

- Participated in an intensive production-ready developer internship program focusing on end-to-end system workflows, architectural understanding, and strong task ownership.
- Applied professional technical standards including proper Git workflows (branching strategies and clear commit messages), disciplined AI usage strictly as a collaborative discussion partner, and maintaining clean, maintainable, and reliable code.
- Maintained rigorous daily discipline through progress documentation, structured daily reporting (progress, blockers, and next steps), and proactive communication when facing technical hurdles.
- Contributed to the development of enterprise system modules by ensuring deep comprehension of system flows, architectural structures, and end-to-end data pipelines.

Altimeda Cipta Visitama **Depok, West Java**
Backend Developer October 2025 - July 2026

- Developed and maintained RESTful APIs for enterprise ERP systems using NestJS, Node.js, Prisma ORM, and PostgreSQL, supporting multiple business-critical workflows.
- Delivered backend functionality across Procurement, Goods Receipt, Transport, Rate Management, and Asset Management modules, contributing to the implementation of core ERP business processes.
- Built Excel import/export and PDF reporting features with data validation and processing logic, enabling users to handle and generate business data more efficiently.
- Integrated third-party APIs and digital signature services, including authentication and attachment management, to extend ERP functionality and support digital business workflows.
- Optimized database queries and backend services to improve application performance and reliability, while working closely with frontend and QA teams to resolve issues and deliver features.
- Contributed to the development and maintenance of a production-oriented enterprise backend, gaining hands-on experience with API integration, database optimization, business logic, and cross-functional software development.

Lakeside FnB Group **Bandung, West Java**
Software Developer September 2024 - August 2025

- Developed a Flutter-based mobile attendance application with real-time geolocation validation, enabling staff attendance to be recorded only when users were within a 50-meter radius of designated outlets.
- Achieved 95.24% accuracy, 100% precision, 94.44% recall, and 100% specificity in validating attendance locations based on confusion-matrix testing.
- Implemented secure authentication, location-based check-in/check-out, and attendance history management to support a more reliable and transparent attendance process.
- Designed application workflows based on stakeholder requirements and operational processes, translating real-world attendance procedures into a mobile digital solution.

- Conducted unit, integration, and system testing to validate application functionality and improve overall application stability and reliability.
- Applied Extreme Programming (XP) through iterative development and continuous user feedback, allowing the application to adapt to changing operational requirements.
- Delivered a digital attendance solution designed to reduce administrative workload, minimize attendance fraud, and improve the accuracy and transparency of staff attendance records.

Telkom University Internal Internship **Bandung, West Java**
Programmer November 2024 - December 2024

- Developed an NLP-based chatbot using PyTorch to automate access to public-service information for the Desa Borobudur website.
- Integrated the chatbot into a web application using Flask, providing an accessible interface for information related to village administration, tourism, and public facilities.
- Implemented Google Sheets integration as a dynamic data-management mechanism, allowing non-technical administrators to update chatbot information without directly modifying the application code.
- Improved chatbot response quality through dataset refinement and model testing, resulting in highly relevant responses during evaluation.
- Developed a model-update workflow that enabled the chatbot's knowledge base to be refreshed as information changed, supporting easier long-term maintenance.
- Contributed to a solution intended to reduce repetitive information requests handled manually by village staff and improve the accessibility of public information.

EDUCATION

Telkom University **Bandung, West Java**
Bachelor of Computing 3.68/4.00 September 2021 - August 2025

- Thesis: Design and Development of a Mobile Attendance Application Based on Geolocation for Lakeside FnB Group Telkom University Staff Using Extreme Programming Method.

PROJECTS

Calorie Counter Application

- Developed a calorie-tracking application that calculates BMI-based nutrition targets from user profile information.
- Implemented personalized calorie recommendations based on individual user characteristics, providing users with tailored daily nutrition targets.
- Designed the application around user-specific data to provide more relevant recommendations than a fixed calorie-target approach.

ACTIVITIES & ORGANIZATIONAL EXPERIENCE

Campus Expo 2021 **Subang, West Java**
Head of Publication, Decoration, and Documentation Division October 2021 - December 2021

- Led the publication, decoration, and documentation division to promote, organize, and document the event.
- Acted as field coordinator, successfully managing the execution of a campus and major introduction event with participants from SMAIT Al-Ukhuwah Pagaden.

Abdimas 2425-2 CompThink SDN Cipagalo **Bandung, West Java**
Trainer March 2025 – July 2025

- Served as a trainer for Computational Thinking workshops for students at SD Negeri Cipagalo 1 Bojongsoang.
- Designed and facilitated Tower of Hanoi games as part of the training activities.
